Call for Details.

Equipped with an Xtra-large, lockable storage compartment, the Lo Riser offers maximum storage capacity.

A flip of a switch hydraulically lowers the deck to ground height to allow fast, drive-on access.

When lowered, the Lo Riser provides a minimum 4° angle ideal for low ground clearance or reduced gradeability vehicles.

For added versatility, the four-position ball hitch allows the Lo Riser to adjust to various vehicle heights.
